

On behalf of your Comox Valley Healthcare Foundation, I hope this letter finds you and your loved ones staying safe and well during this challenging time. One thing I've learned since moving here is that Comox Valley residents are both resilient and compassionate, and I know that if we are vigilant, and support one another, we will get through this.

The COVID-19 (coronavirus) is affecting thousands of people every day throughout the world, and as you probably know it has made its way to our beautiful Island. Rest assured, every precaution to ensure the safety and health of patients, residents, and staff at our local hospital and other healthcare facilities during this crisis is being taken. We have highly-skilled professionals and caregivers who are ready to meet this challenge head on.

Our Foundation, the hospital, and other healthcare service providers in the Comox Valley have received a tremendous outpouring of well-wishes from the community, and we sincerely thank you for that! Our healthcare workers put their own well-being on the line every day to help all of us, providing exemplary care... they always have, and they always will. While getting the greater community through this crisis, staff continue to deal with all the other daily medical challenges that come their way, and the current combination is putting an extraordinary amount of stress on them.

That is why we are reaching out to you today. To continue supporting the critical work being done here, **we graciously ask you to make a donation to the Comox Valley Healthcare Foundation, in support of our hospital and care centres Areas of Greatest Need.** These funds will help ease the strain on our workers by ensuring they have access to the critical medical equipment and supplies they need to continue serving this community at the highest possible level.

**Your gift today will help us towards achieving our goal of keeping everyone in our community safe and healthy through the coming weeks, and months.**

Thank you for your time and thoughtful consideration. It is through people, pride, and passion we exist. Please stay safe, and adhere to local, provincial, and federal guidelines to ensure you, those you care for, and your community are okay.

All the best to you and yours.

Sincerely,

Colt Long, CFRE  
Executive Director, Comox Valley Healthcare Foundation
